	Description	Page No.
	CERTIFICATE	ii
	CANDIDATE'S DECLARATION	iii
	ABSTRACT	iv-vii
	ACKNOWLEDGEMENT	viii
	CONTENTS	ix-xiv
	LIST OF FIGURES	xv-xvi
	LIST OF TABLES	xvii-xix
	LIST OF PUBLICATIONS	xx-xxi
	LIST OF ABBREVIATIONS	xxii-xxiii
	CHAPTER 1: INTRODUCTION	1-27
1.1	Background and Motivation	1
1.2	Biometric System	3
1.2.1	Physiological and Behavioral Biometric Traits	4
1.2.2	Handwriting: A Behavioral Biometric Trait	6
1.2.2.1	Features of Handwriting	7
1.2.2.2	Offline vs Online Handwriting	7
1.2.2.3	Masculine vs Feminine Handwriting	9
1.2.2.4	Handwriting Identification vs Handwriting Verification	10
1.2.2.5	Significance of handwriting in proposed study	10
1.3	Gender Classification System	11
1.4	Writer Identification System	13
1.5	Challenges and Issues	15
1.6	Stages of Gender Classification and Writer Identification System	16
1.6.1	Data Collection	16
1.6.2	Digitization and Pre-processing	17
1.6.3	Feature Extraction	17
1.6.4	Dimensionality Reduction	17

1.6.5	Classification	18
1.6.6	Hybridization of Feature Extraction and Classification Techniques	18
1.7	Salient Terminologies	18
1.7.1	Writer Identification vs Writer Verification	18
1.7.2	Text Dependent vs Text Independent	19
1.7.3	Single Script vs Multi-scripts	20
1.8	Approaches used for Gender classification and Writer Identification System	20
1.9	Applications of Gender classification and Writer Identification System	21
1.10	Overview of Gurumukhi Script	22
1.11	Objectives of the Proposed Work	24
1.12	Major Assumptions	25
1.13	Major Contributions and Achievements	25
1.14	Chapter Summary	26
1.15	Organization of The Thesis	26
 CHAPTER 2: REVIEW OF LITERATURE		 28-50
2.1	State-of-the-art work on Handwriting Based Gender Classification System	28
2.2	State-of-the-art work on the Writer Identification System	32
2.2.1	Based on non-Indic Scripts	32
2.2.2	Based on Indic Scripts	37
2.2.3	Based on Multiscripts	39
2.3	Research Gaps and critical analysis based on state-of-the-artwork on the Gender Classification and Writer Identification System	48
2.4	Chapter Summary	50
 CHAPTER 3: DATA COLLECTION AND FRAMEWORK FOR GENDER CLASSIFICATION AND WRITER IDENTIFICATION SYSTEMS		 51-73
3.1	Corpus Generation	51
3.1.1	Generating Corpus for Gender Classification System	52
3.1.2	Generating Corpus for Writer Identification System	52

3.1.3	Samples of Offline Male and Female Data	53
3.1.4	Novel Contribution and Achievement	54
3.2	Framework for Gender Classification and Writer Identification Systems	54
3.2.1	Digitization	55
3.2.2	Pre-processing	57
3.2.2.1	Slicing	57
3.2.2.2	Normalization	58
3.2.2.3	Thinning	58
3.2.3	Feature Extraction	59
3.2.3.1	Zoning Features	59
3.2.3.2	Diagonal Features	60
3.2.3.3	Transition Features	60
3.2.3.4	Peak Extent Features	61
3.2.3.5	Curve Fitting Features	62
3.2.3.6	Intersection and Open-End Point Features	63
3.2.4	Dimensionality Reduction	63
3.2.5	Classification Techniques	64
3.2.5.1	Adaptive Boosting (AdaBoost)	65
3.2.5.2	Artificial Neural Network (ANN)	66
3.2.5.3	Decision Tree (DT)	66
3.2.5.4	K-Nearest Neighbour (K-NN)	67
3.2.5.5	Random Forest (RF)	68
3.2.5.6	Multi-Layer Perceptron (MLP)	69
3.2.5.7	Support Vector Machine (SVM)	69
3.2.6	Hybridization of Feature Extraction and Classification Techniques	70
3.2.7	Evaluating Performance Metrics	71
3.3	Chapter Summary	73

CHAPTER 4: GENDER CLASSIFICATION AND WRITER IDENTIFICATION SYSTEM USING HYBRIDIZATION OF VARIOUS FEATURE EXTRACTION TECHNIQUES **74-91**

4.1	Introduction	74
-----	--------------	----

4.2	Feature Extraction Techniques	75
4.3	Hybridization of Feature Extraction Techniques	75
4.4	Gender Classification System based on Hybridization of Features Extraction Techniques	77
4.4.1	Dataset and Pre-processing	77
4.4.2	Feature Extraction and Classification Techniques	78
4.4.3	Experimental Results and Performance Metrics	79
4.4.3.1	Accuracy Rate	80
4.4.3.2	False Positive Rate	80
4.4.3.3	Precision Rate	81
4.4.3.4	Root Mean SquareError (RMSE)	82
4.4.3.5	Area Under Curve (AUC)	83
4.4.4	Syntactic Analysis	84
4.5	Writer Identification System based on Hybridization of Features Extraction Techniques	85
4.5.1	Dataset and Pre-processing	85
4.5.2	Feature Extraction and Classification Techniques	86
4.5.3	Experimental Results and Performance Measures	87
4.5.3.1	Writer Identification Accuracy	87
4.5.3.2	True Positive Rate	89
4.5.3.3	False Positive Rate	89
4.5.4	Syntactic Analysis	90
4.6	Discussion and Conclusion	90

CHAPTER 5: PCA BASED GENDER CLASSIFICATION AND WRITER IDENTIFICATION SYSTEM **92-105**

5.1	Introduction	92
5.2	Principal Component Analysis	92
5.2.1	Need of Principal Component Analysis (PCA)	93
5.2.2	Strengths and Weakness with PCA	94
5.2.3	Working of PCA	95

5.2.4	Impact of PCA on Feature Vector	96
5.3	Principal Component Analysis based Gender Classification System	96
5.3.1	Dataset and Pre-processing	97
5.3.2	Feature Extraction and Classification Techniques	97
5.3.3	Experiment Results and Performance Metrics	98
5.3.4	Syntactic Analysis	101
5.4	Principal Component Analysis based Writer Identification System	101
5.4.1	Dataset and Pre-processing	101
5.4.2	Feature Extraction and Classification Techniques	102
5.4.3	Experimental Results and Performance Metrics	102
5.4.4	Syntactic Analysis	105
5.5	Conclusion	105

CHAPTER 6: GENDER CLASSIFICATION AND WRITER IDENTIFICATION SYSTEM BASED ON CURVE FITTING AND INTERSECTION & OPEN-END POINT FEATURES 106-120

6.1	Introduction	106
6.2	Curve Fitting and Intersection & Open-End Point Features	107
6.2.1	Curve Fitting Features	107
6.2.2	Intersection and Open-End Point Features	110
6.2.3	Experimental Results and Discussion	111
6.3	Majority Voting Scheme	111
6.4	Hybridization of Classification Techniques	112
6.5	System Performance based on Curve Fitting Features and Hybridization of Classification Techniques	114
6.5.1	Experimental Results for Gender Classification System	114
6.5.2	Experimental Results for Writer Identification System	115
6.6	System Performance based on Intersection & Open-End Point Features and Hybridization of Classification Techniques	116
6.6.1	Experimental Results for Gender Classification System	116
6.6.2	Experimental Results for Writer Identification System	117
6.7	Comparative Analysis	117

6.8	Discussion and Conclusion	119
CHAPTER 7: HYBRIDIZATION OF FEATURES AND CLASSIFICATION TECHNIQUES FOR GENDER CLASSIFICATION AND WRITER IDENTIFICATION SYSTEM		121-130
7.1	Introduction	122
7.2	System Performance for Gender Classification and Writer Identification	122
7.2.1	Dataset Collection	122
7.2.2	Implementation of Feature Extraction and Classification Techniques	123
7.3	Hybridization of Feature Extraction and Classification Techniques	125
7.4	System Performance for Gender Classification based on the Hybridization of Feature Extraction and Classification Techniques	127
7.5	System Performance for Writer Identification based on the Hybridization of Feature Extraction and Classification Techniques	128
7.6	Comparative Analysis	129
7.7	Discussion and Conclusion	129
CHAPTER 8: CONCLUSION AND FUTURE PERSPECTIVES		131-139
8.1	Major Contribution and Achievements of the Work	132
8.1.1	Generating dataset for Gender Classification and Writer Identification System	133
8.1.2	Hybridization of Feature Extraction Techniques for Gender Classification and Writer Identification System	133
8.1.3	Principal Component Analysis based Gender Classification and Writer Identification System	134
8.1.4	Curve Fitting and Intersection & Open-End Point based Gender Classification and Writer Identification System	134
8.1.5	Gender Classification and Writer Identification based on Majority Voting Scheme	135
8.2	Comprehensive Representation of Experimental Results	135
8.3	Discussion	138

8.4 Future Perspectives
