Candidate's Declaration	ii
Abstract	iii
Dedication Page	ix
Acknowledgements	x
Table of Contents	xii
List of Figures	xvii
List of Tables	xxi
Preface	xxii

S. No.	Particulars	Page No.
Chapter 1:	Introduction	1
1.1	Radiations and Radioactivity: General Information	2
1.2	Types of Radiations	3
1.2.1	Non-ionizing Radiations	4
1.2.2	Ionizing Radiations	4
1.3	Radiation Sources	6
1.3.1	Natural Sources	7
1.3.2	Artificial Sources	7
1.4	Terminology	8
1.4.1	Activity	9
1.4.2	Energy and Exposure	9
1.4.3	Dose and Units	9
1.5	Health Effects due to Radiation Exposure	10
1.6	Radiation Exposure Pathways	12
1.6.1	Internal Exposure	12
1.6.2	External Exposure	12
1.7	Radiation Monitoring	13
1.8	Natural Radionuclides and Decay Series	14
1.9	Uranium	16
1.9.1	General Information	16
1.9.2	Sources	17
1.9.3	Exposure Mechanism	19

S. No.	Particulars	Page No.
1.9.4	Significance of Study	20
1.9.5	Biokinetic Model	22
1.10	Radon, Thoron and Their Progeny	24
1.10.1	General Information	24
1.10.2	Sources	25
1.10.3	Transport of Radon from Soil to Atmosphere	27
1.10.4	Significance of Study	28
1.11	Studied Area	29
1.12	Objectives	31
Chapter 2:	Materials, Instrumentation and Experimental Techniques	33
2.1	Single Entry Pinhole Dosimeter	34
2.2	Direct Radon/Thoron Progeny Sensors (DRPS/DTPS)	36
2.3	Cellulose Nitrate LR-115 Type-II Films (SSNTD)	37
2.4	Constant Temperature Bath Unit for Etching	39
2.5	Spark Counter	41
2.6	Smart RnDuo: A Scintillation Based Detector	44
2.6.1	Standard Protocol for Radon/ Thoron Measurement	45
2.6.2	Standard Protocol for Radon Mass Exhalation Rate in Soil	45
2.6.3	Standard Protocol for Thoron Surface Exhalation Rate in Soil	46
2.6.4	Standard Protocol for Radon in Water	47
2.7	LED Fluorimeter	48
2.8	pH and TDS/EC Meter	50
Chapter 3:	Radon/Thoron and Their Progeny Concentration in the Dwellings	51
3.1	Introduction	52
3.2	Methodology	53
3.2.1	Lab and Field Work: Using Passive Technique	53
3.2.2	Field Work: Using Active Technique	55

S. No.	Particulars	Page No.
3.3	Formulae Used	56
3.3.1	To Calculate Indoor Radon (C_r) and Thoron (C_t) Gas Concentration	56
3.3.2	To Calculate Equivalent Radon/Thoron Progeny Concentration (EERC/EETC)	57
3.3.3	To Calculate Equilibrium Factor	57
3.3.4	To Calculate Annual Effective Inhalation Dose Due to Radon/Thoron and Their Progeny Concentration (AEDR/AEDT)	58
3.4	Results and Discussion	58
3.4.1	Radon/Thoron and Their Progeny Concentration using Passive Technique	58
3.4.1.1	Seasonal Variations	58
3.4.1.2	Annual Average Concentration	61
3.4.1.3	Equilibrium Factor	62
3.4.1.4	Frequency Distribution	62
3.4.1.5	Correlation between Radon/Thoron and Their Progeny Concentration	66
3.4.1.6	Box whisker plots	68
3.4.1.7	Annual Effective Dose	70
3.4.2	Radon/Thoron Gas Concentration using Active Technique	72
3.5	Conclusion	73
Chapter 4:	Radon/Thoron Exhalation Rates and its Correlation with Their Concentration in the Dwellings	97
4.1	Introduction	98
4.2	Methodology	100
4.2.1	Collection of Samples and Lab Work	100
4.3	Formulae Used	101
4.3.1	To Calculate Radon Mass Exhalation Rate (J_m)	101
4.3.2	To Calculate Thoron Surface Exhalation Rate (J_{th})	101

S. No.	Particulars	Page No.
4.4	Results and Discussion	102
4.4.1	Radon Mass/Thoron Surface Exhalation Rates	102
4.4.2	Frequency Distribution	103
4.4.3	Correlation between Radon/Thoron Exhalation Rates with the Radon/Thoron Concentration in the Dwellings	104
4.5	Conclusion	107
Chapter 5:	Radon Concentration in Water and Dose Estimation	115
5.1	Introduction	116
5.2	Methodology	118
5.2.1	Field Work	118
5.3	Formulae Used	119
5.3.1	To Calculate Radon in Water	119
5.3.2	To Calculate Annual Effective Dose Due to Ingestion and Inhalation	120
5.3.2.1	To Calculate Ingestion Dose	120
5.3.2.2	To Calculate Inhalation Dose	120
5.4	Result and Discussion	121
5.4.1	Radon Concentration in Water	121
5.4.2	Frequency Distribution	122
5.4.3	Correlation between Radon Concentration in Underground Water with Depth (in meters)	123
5.4.4	Comparison between Radon Concentration in Surface Water with Underground Water	124
5.5	Conclusion	126
Chapter 6:	Uranium Concentration in Water and Biokinetic Modelling	141
6.1	Introduction	142
6.2	Methodology	145
6.2.1	Sample Collection and Lab Work	145
6.2.2	Biokinetic Modelling	146

S. No.	Particulars	Page No.
	6.2.3 Physicochemical Parameters	146
6.3	Formulae Used	147
	6.3.1 To Calculate Radiological Risk Assessment	147
	6.3.2 To Calculate Chemical Risk Assessment	147
	6.3.3 To Calculate Annual Effective Ingestion Dose	148
6.4	Results and Discussion	148
	6.4.1 Uranium Concentration in Water	148
	6.4.1.1 Frequency Distribution	150
	6.4.1.2 Correlation between Uranium Concentration in Underground Water with Depth (in meters)	151
	6.4.2 Results of Biokinetic Modelling	154
	6.4.2.1 Radiological Contamination/Retention of Uranium in Various Compartments of Human Body	154
	6.4.2.2 Removal of Uranium from Human Body Through Excretory Paths: Hair, Faeces and Urine	156
	6.4.2.3 Doses to Various Organs of Human Body	156
	6.4.3 Physicochemical Factors	160
	6.4.3.1 pH Value	160
	6.4.3.2 Total Dissolved Solids (TDS)	161
	6.4.3.3 Electrical Conductivity (EC)	162
6.5	Conclusion	166
	Overall Conclusion	205
	Future Scope	208
	Bibliography	209
	Author's Biodata	231
	Research Publications in Journals	232
	Paper Presented in Conferences	233
